DETAILED ACTION

In view of the appeal brief filed on 03/25/2008, PROSECUTION IS HEREBY REOPENED. A new grounds of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

/Robert E Pezzuto/

Supervisory Patent Examiner, Art Unit 3714.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 37-56 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims 37-56 fail(s) to correspond in scope with that which applicant(s) regard as the invention can be found in the reply filed 03/25/2008. In that paper, applicant has stated the problem solved by the invention is in circumventing

Art Unit: 3714

the "consistent page domain security requirement", and this statement indicates that the invention is different from what is defined in the claim(s) because the claims in no manner include the process, which applicant has described in paragraphs 40-43, required to circumvent this requirement. The claims recite passing events between multiple frames from multiple domains, but do not recite any of the masking features recited in the above cited sections of the specification. As the applicant has repeatedly argued that circumventing the "consistent page domain security requirement" is the novel and non-obvious portions of the invention, the exclusion of the features required to implement this functionality is clear evidence that the applicant has failed to claim what they regard as the invention.

Response to Arguments

2. Applicant's arguments with respect to claims 37-56 have been considered but are moot in view of the new ground(s) of rejection.
